MyMap 4 Fund

A sub-fund of BlackRock Investment Funds

Class D Accumulating GBP

ISIN: GB00BFBFYJ57

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund is a fund in a series of MyMap funds and the number allocated to the Fund does not directly relate to the level of risk or return within the Fund and is used simply to differentiate the Fund from the other MyMap branded funds in the BlackRock Investment Funds umbrella.
- ▶ The aim of the Fund is to provide, over five year periods, a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) through an actively managed portfolio, whilst also maintaining a risk profile (i.e. an evaluation of the risks (e.g. risk of losses) associated with the portfolio) for the Fund's portfolio of 6%-9%.
- ▶ The risk profile of the Fund's portfolio, for this purpose, is measured as the volatility (i.e. the degree of fluctuation) of the Fund's returns converted into an annual rate, over a five year period. Generally, the higher the volatility, the riskier the investment.
- ▶ Although the Fund aims to achieve its investment objective, there is no guarantee that this will be achieved, and the Fund may experience loss. The Fund's risk profile may fall outside the stated range from time to time. There can be no guarantee that the Fund will maintain the target level of risk, especially during periods of unusually high or low volatility in the equity and fixed income markets. The Fund's potential gains and losses are likely to be constrained by the aim to stay within the predefined risk profile. The Fund's capital is at risk, meaning that the Fund could suffer a decrease in value and the value of your investment could decrease as a result.
- ▶ The Fund will seek to achieve its investment exposure by investing predominantly (more than 80% of the Fund's net asset value) in units of other funds, including, but not limited to exchange traded funds and other index funds managed by an affiliate of the BlackRock Group.
- ▶ At any one time, a substantial amount, or even all of the Fund's assets may be held in units of other funds.
- ▶ The Fund will seek to achieve its investment objective by obtaining indirect exposure to a variety of asset classes globally, including equity securities (e.g. shares), fixed income securities (such as corporate bonds and government bonds), cash and near cash instruments (such as money market instruments (i.e. debt securities with short term maturities)).
- ▶ The Fund will seek to stay within the stated risk profile by varying its asset allocations (i.e. mix of assets) in different market conditions. Given the lower risk profile of the Fund, under normal market conditions the Fund will seek a greater exposure to fixed income securities (which are generally considered to be less risky compared to equity securities), compared to a fund with a higher risk profile which would seek to have a greater exposure to equity securities (which are generally considered to be more risky compared to fixed income securities).
- ▶ The Fund may hold up to 15% of the Fund's net asset value indirectly in alternative asset classes (such as, but not limited to real estate and commodities (i.e. precious metals)).
- ▶ The Fund may also invest directly in financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) cash, near cash instruments, and forward transactions, for investment purposes and for the purposes of efficient portfolio management, including to hedge currency exposure to enable the Fund to profit from changes in currency exchange rates against the base currency of the Fund.
- ▶ The Fund is actively managed and the investment manager has discretion to select the Fund's investments and is not constrained by any benchmark in this process.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or unit class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

Past Performance

Past performance is not a guide to future performance.

The Fund was launched in 2019. The unit class was launched in 2019.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

This chart has been left intentionally blank as there is less than one year's performance data.

Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Fund. These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at www.blackrock.com or by calling Investor Services on 0800 44 55 22.
- ▶ Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- ▶ The Fund is a sub-fund of BIF, an umbrella structure comprising different subfunds. This document is specific to the Fund and unit class stated at the beginning of this document. However, the Fund's prospectus, annual and half-yearly reports are prepared for the BIF umbrella.
- ▶ BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- ▶ Under UK law, BIF has segregated liability between its sub-funds (i.e. the Fund's assets will not be used to discharge the liabilities of other sub-funds within BIF). In addition, the Fund's assets are held separately from the assets of other sub-funds.
- ▶ Investors may switch their units in the Fund for units in another sub-fund within BIF, subject to meeting certain conditions as set out in the prospectus.
- ▶ The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at www.blackrock.com/Remunerationpolicy or on request from the registered office of the Management Company.

Global Strategy Balanced Portfolio

a sub-fund of HSBC OpenFunds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C
ISIN: GB00B76WP695

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The aim of the Fund is to provide capital **growth** through diversified investment across global markets.
- This is one of a range of **actively managed** Global Strategy Portfolios offered at five different risk levels. The **asset allocation** of each fund in the range reflects the risk level. The Fund is rated as 3, where 1 is a lower level of risk and 5 is a higher level of risk. The Fund is managed with the aim of maximizing **returns** in line with its agreed long term risk profile. Therefore any potential gains are likely to be limited by the risk profile of the Fund.
- The level of risk stated is to allow investors to compare the risk relative to other Global Strategy Portfolios. This differs from the Risk and reward profile below. This is information we are required to provide by regulation, which allows investors to compare the risk for different Funds.
- The Fund aims to meet its objective with a focus on lower ongoing charges. The Fund aims to provide sufficient diversification across asset classes and the focus on lower ongoing charges may mean that certain asset classes aren't considered.
- To achieve its aim the Fund will invest primarily in **collective investment schemes** (funds), including **exchange traded** funds, which aim to track the performance of **market indices**. Such assets shall, in turn, invest in **equities** (shares of companies), fixed interest securities (fixed interest securities, including **bonds** and gilts, are a type of loan taken out by companies and governments that pay interest), property companies and real estate investment trusts that make up the index.
- Currently 89% of the Fund invests in **collective investment schemes** that aim to track the performance of an index.
- The **collective investment schemes** that the Fund invests in will, where possible, be those managed or operated by the ACD or an associate of the ACD. Where this isn't possible the Fund may invest in **collective investment schemes** operated by third party fund providers.
- The Fund may also invest directly in **equities**, fixed interest securities, property companies and real estate investment trusts where exposure to an asset class can be adequately achieved with a relatively low number of holdings.
- The Fund may use **derivatives** (financial instruments whose value is based on an underlying asset) for investment purposes. Using **derivatives** for investment purposes means, in particular, maintaining positions in the investments for the longer term. **Derivatives** may also be used to offset against movements in currency exchange rates, falls in asset values and reducing the risk associated with changes to prices within the market. However, it is envisaged that the use of **derivatives** will not be extensive and will not affect the overall risk profile of the Fund.
- Under normal market conditions, the Fund will have the following asset class exposures: **Equity**: 45-70%, Fixed Interest: 20-55%, Property Securities: 0-10%. These percentages will fluctuate based upon market movement and adjustments to the **asset allocation** to enable the Fund to meet its aim.
- The Fund may also invest in **money market instruments**, deposits and cash to manage day-to-day cash flow requirements.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Interest Rate Risk** When interest rates rise, bond values generally fall. This risk of this happening is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- Investment fund risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure is based on last year's expenses for the year ending 15/10/2019. Charges may vary from year to year.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Warning: the performance returns before the change in investment objective(s) on 16 October 2015 were achieved under circumstances that no longer apply.
- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The Fund was launched on 17 October 2011.

Vanguard LifeStrategy® 60% Equity Fund (the "Fund")

A sub-fund of Vanguard LifeStrategy® Funds ICVC

A GBP Accumulation Shares

ISIN: GB00B3TYHH97

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to hold investments that will pay out money and increase in value through a portfolio comprising approximately 60% shares and 40% bonds and other similar fixed income investments.
- The Fund gains exposure to shares and bonds and other similar fixed income investments by investing more than 90% of its assets in Vanguard passive funds that track an index ("Associated Schemes"). Direct investment in shares and bonds and other similar fixed income investments may also be made.
- The Fund is actively managed in that the Investment Adviser has discretion in respect of the Associated Schemes in which the Fund may invest and the allocations to them, each of which may change over time. The Investment Adviser manages the Fund through the pre-determined exposure to shares and bonds (and other similar fixed income investments), as detailed above.
- The Fund will have exposure to shares of UK companies and non-UK companies (including emerging markets (i.e. countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body)), and to Sterling-denominated and non-Sterling denominated bonds (including government bonds, index-linked bonds and UK investment-grade bonds). The UK will generally form one of the largest single country exposures for shares and bonds.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund makes investments which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund or the Associated Schemes in which the Fund may invest, may engage in short term secured lending of their investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund is more appropriate for long term investments.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

For further information about the objectives and investment policy of the Fund, please see Appendix 1 of the Vanguard LifeStrategy Funds ICVC prospectus (the "prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 4 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and bonds can be affected by factors such as stock market movements, interest rates, credit spreads and volatility. Other driving factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity risk', restrictions on investment or transfer of assets and failed/delayed delivery of securities or payments to the Fund.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.
- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The underlying Funds are not expected to track the performance of the Index at all times with perfect accuracy. The underlying Funds are, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the underlying Funds use an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the underlying Funds may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

For further information on risks please see the "Risk Factors and Performance" section of the prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
