This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Strategy Adventurous Portfolio

a sub-fund of HSBC OpenFunds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Accumulation C
ISIN: GB00BYVXBH99

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** in line with its risk profile in the long term, which is a period of 5 years or more.
- This is one of a range of **actively managed** Global Strategy Portfolios offered at five different risk levels. The Fund is rated as 5, where 1 is a lower level of risk and 5 is a higher level of risk.
- The level of risk stated is to allow investors to compare the risk relative to other Global Strategy Portfolios. This differs from the Risk and reward profile below, which we are required to provide by regulation and which allows investors to compare the risk for different types of funds.
- As the Fund is managed with the aim of maximising **returns** in line with its long term risk profile any potential **returns** are likely to be limited by the risk profile of the Fund.
- To achieve its objective the Fund will invest a minimum of 80% in other funds, including funds which aim to track the performance of **market indices**. The other funds will in turn invest in a range of asset types such as shares of companies (**equities**), **bonds** and property that make up the index. The Fund will be invested across global markets and typically the Fund will have a bias towards asset classes that focus on **equities**.
- The other funds that the Fund invests in will, where possible, be those managed by the **HSBC Group**. Where this isn't possible the Fund may invest in funds managed by other fund providers.
- The Fund may invest up to 20% of its value directly in asset types such as **bonds** where the investment objective can be more efficiently achieved, as well as cash.
- The Fund aims to meet its objective with a focus on lower ongoing charges. This is taken into consideration when deciding which asset classes the Fund will invest in and how the Fund achieves exposure to those asset types.
- The **asset allocation** of each fund in the range reflects the risk level. Under typical market conditions, the **asset allocation** of the Fund will be as follows: **Equities**: 75%-100%, **Bonds**: 0%-25%, Other asset types, including cash: 0%–25%. These percentages will fluctuate based upon market movement and adjustments to the **asset allocation** to enable the Fund to meet its aim.

Use of Benchmarks

- The Fund is not managed with reference to a benchmark. The performance of the Fund is compared against the performance of funds that are part of the Morningstar Adventurous Allocation Category, with both **returns** and **volatility** considered in the comparison.

Use of Derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management** purposes, including **hedging**, and for broader investment purposes to help the Fund meet its objective. In particular **derivatives** will be used to reduce or increase the Fund's exposure to different types of assets and to reduce the risk associated with movements in the rate of exchange between Sterling and other currencies in which the Fund's assets may be held. The Fund does not intend to use **derivatives** extensively and their use will be consistent with the risk profile of the Fund.
- Income is reinvested.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 5 because its price or simulated data has shown medium to high fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- **Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- **Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- **Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- **Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- **Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- **Interest Rate Risk** When interest rates rise, bond values generally fall. This risk of this happening is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- **Investment Fund Risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- **Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- **Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- **Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.23%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure shown here is an estimate of the charges. The ongoing charges figure shown is an estimate due to a material change in the fee structure. The Fund's annual report for each financial year will include detail on the exact charges made.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The Fund was launched on 23 August 2017.

Vanguard Global Small-Cap Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Acc

ISIN: IE00B3X1NT05

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to provide long-term capital growth by tracking the performance of the MSCI World Small Cap Index (the "Index").
- The Index is comprised of small-sized company stocks in developed markets.
- The Fund attempts to:
 - Track the performance of the Index by investing in all constituent securities of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
 - Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain

bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on

<https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11630>

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc prospectus (the "prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund may use an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full index.

For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>

Vanguard LifeStrategy® 100% Equity Fund (the "Fund")

A sub-fund of Vanguard LifeStrategy® Funds ICVC

A GBP Accumulation Shares

ISIN: GB00B41XG308

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to hold investments that will pay out money and increase in value through a portfolio comprising approximately 100% shares.
- The Fund will seek to achieve its investment objective by investing more than 90% of its assets in passive funds that track an index, which are managed or operated by the ACD or its associates ("Associated Schemes").
- The Fund will have exposure (through its investment in Associated Schemes) to shares of UK companies and non-UK companies (including emerging markets (i.e. countries that are progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body)). The UK will generally form one of the largest single country exposures for shares.
- The Fund may also invest directly in transferable securities (such as shares, bonds and other similar fixed income investments) (which will generally be components of the indices tracked by the Associated Schemes in which the Fund invests), money market instruments and deposits.
- The Fund is actively managed in that the Investment Adviser has discretion in respect of the Associated Schemes in which the Fund may invest and the allocations to them, each of which may change over time. The Investment Adviser manages the Fund through the pre-determined exposure to shares and bonds (and other similar fixed income investments), as detailed above.
- The Fund attempts to remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives (i.e. a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index) in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management").
- The currency of the share class is GBP.
- The Fund makes investments which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund is more appropriate for long term investments.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.

- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which units in the Fund cannot be sold is available on: <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause

the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.

- Index tracking risk. The underlying Funds are not expected to track the performance of the Index at all times with perfect accuracy. The underlying Funds are, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the underlying Funds use an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the underlying Funds may not, in the aggregate, approximate the full Index.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.
