MyMap 5 Select ESG Fund

A sub-fund of BlackRock Investment Funds

Class D Accumulating GBP

ISIN: GB00BFBFYX91

Manager: BlackRock Fund Managers Limited

Objectives and Investment Policy

- ▶ The Fund is a fund in a series of MyMap funds and the number allocated to the Fund does not directly relate to the level of risk or return within the Fund and is used simply to differentiate the Fund from the other MyMap branded funds in the BlackRock Investment Funds umbrella.
- ▶ The aim of the Fund is to provide, over five-year periods, a return on your investment (generated through an increase in the value of the assets held by the Fund and/or income received from those assets) through an actively managed portfolio, whilst also maintaining a risk profile (i.e. an evaluation of the risks (e.g. risk of losses) associated with the portfolio) for the Fund's portfolio of 8%-11%. At least 80% of the Fund's asset allocation will be invested in other funds which are subject to ESG-related requirements (i.e. "environmental, social and governance" related investment criteria).
- ▶ The risk profile of the Fund's portfolio, for this purpose, is measured as the volatility (i.e. the degree of fluctuation) of the Fund's returns converted into an annual rate, over a five-year period. Generally, the higher the volatility, the riskier the investment.
- ▶ Although the Fund aims to achieve its investment objective, there is no guarantee that this will be achieved and in particular, there is no guarantee that the Fund will achieve its income objective. The Fund's risk profile may fall outside the stated range from time to time. There can be no guarantee that the Fund will maintain the target level of risk, especially during periods of unusually high or low volatility in the equity and fixed income markets. The Fund's potential gains and losses are likely to be constrained by the aim to stay within the predefined risk profile. The Fund's capital is at risk, meaning that the Fund could suffer a decrease in value and the value of your investment could decrease as a result.
- ▶ The Fund will seek to achieve its investment exposure by investing predominantly (more than 80% of the Fund's asset allocation) in units of other funds or investment products, including, but not limited to exchange traded products and index funds which may be Associated Funds as explained in the Fund's prospectus. At any one time, a substantial amount, or even all of the Fund's assets may be held in units of other funds.
- ▶ The Fund will seek to achieve its investment objective by obtaining indirect exposure to a variety of asset classes globally, including equity securities (e.g. shares) and other equity related securities, fixed income securities (such as corporate bonds and government bonds) and other fixed income related securities, cash and near cash instruments (such as money market instruments (i.e. debt securities with short term maturities)). The Fund will seek to stay within the stated risk profile by varying its asset allocations (i.e. mix of assets) in different market conditions. The Fund may hold up to 15% of the Fund's net asset value indirectly in alternative asset classes (such as, but not limited to real estate and commodities (e.g. precious metals)).
- ▶ Given the risk profile of the Fund, under normal market conditions the Fund will seek a greater exposure to equity securities (which are generally considered to be more risky compared to fixed income securities), compared to a fund with a lower risk profile which would seek to have a greater exposure to fixed income securities (which are generally considered to be less risky compared to equity securities).
- ▶ The Fund's ESG investments will comprise, firstly, funds which track benchmark indices that exclude certain investments based on ESG-related limits or thresholds and, secondly, funds which track benchmark indices comprising developed market government bond issuers with an ESG sovereign rating of BB or higher (as defined by MSCI or another third party data vendor). The investment manager will consider ESG-related factors at the time of purchasing an investment. Where securities no longer meet such requirements, the Fund may continue to hold them, other than as an ESG related investment or until it is practicable to sell them. No minimum ESG requirements apply to the Fund's investments.
- ▶ The Fund may also invest directly in financial derivative instruments (i.e. investments the prices of which are based on one or more underlying assets) cash, near cash instruments, and forward transactions, for investment purposes and for the purposes of efficient portfolio management, including to hedge currency exposure to enable the Fund to profit from changes in currency exchange rates against the base currency of the Fund. The relevant underlying assets may not satisfy the ESG criteria described above.
- ▶ The Fund is actively managed without reference to a benchmark meaning the investment manager has absolute discretion to select the Fund's investments and is not constrained by any target, comparator or performance benchmark.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating units (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at www.blackrock.com

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- The Fund may seek to exclude Funds which are not subject to ESG-related requirements. Investors should therefore make a personal ethical assessment of the Fund's ESG screening prior to investing in the Fund. Such ESG screening may adversely affect the value of the Fund's investments compared to a fund without such screening.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.

– Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or unit class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.17%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The Fund was launched in 2020. The unit class was launched in 2020.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

This chart has been left intentionally blank as there is less than one year's performance data.

Practical Information

- ▶ The trustee and depositary of the Fund is The Bank of New York Mellon (International) Limited, which also acts as custodian.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the Fund. These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at www.blackrock.com or by calling Investor Services on 0800 44 55 22.
- ▶ Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- ▶ The Fund is a sub-fund of BIF, an umbrella structure comprising different subfunds. This document is specific to the Fund and unit class stated at the beginning of this document. However, the Fund's prospectus, annual and half-yearly reports are prepared for the BIF umbrella.
- ▶ BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- ▶ Under UK law, BIF has segregated liability between its sub-funds (i.e. the Fund's assets will not be used to discharge the liabilities of other sub-funds within BIF). In addition, the Fund's assets are held separately from the assets of other sub-funds.
- ▶ Investors may switch their units in the Fund for units in another sub-fund within BIF, subject to meeting certain conditions as set out in the prospectus.
- ▶ The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at www.blackrock.com/Remunerationpolicy or on request from the registered office of the Management Company.

Global Sustainable Multi-Asset Conservative Portfolio

a sub-fund of HSBC OpenFunds, (the "OEIC");
managed by HSBC Global Asset Management (UK) Limited

Class: Income C
ISIN: GB00BF1H4G82

Explanations of terms shown within the objectives and policy in bold, can be found within the glossary on our website: <http://www.assetmanagement.hsbc.com>.

Objectives and Investment Policy

- The Fund aims to provide **growth** through investment in assets that meet sustainable investment principles in the long term, which is a period of five years or more.
- The Fund invests in a range of **sustainable investment strategies**. A summary of the **sustainable investment strategies** that we consider for inclusion in the Fund is detailed in the Prospectus.
- This is one of a range of **actively managed** Global Sustainable Multi-Asset Portfolios offered at different risk levels. The Fund is rated as 2, where 1 is a lower level of risk and 5 is a higher level of risk.
- The level of risk stated is to allow investors to compare the risk relative to other Global Sustainable Multi-Asset Portfolios. This differs from the Risk and reward profile below, which we are required to provide by regulation and which allows investors to compare the risk for different types of funds.
- As the Fund is managed with the aim of maximising **returns** in line with its long term risk profile any potential **returns** are likely to be limited by the risk profile of the Fund.
- To achieve its objective the Fund will invest a minimum of 60% of its value in other funds that in turn invest in range of asset types such as **bonds**, shares of companies (**equities**) and property that meet one or more **sustainable investment strategies**, as well as cash. The Fund will be invested across global markets.
- The other funds that the Fund invests in will, where possible, be those managed by the **HSBC Group**. Where this isn't possible the Fund may invest in funds managed by other fund providers.
- The Fund may invest up to 40% of its value directly in asset types such as **bonds** where the investment objective can be more efficiently achieved, as well as cash.
- The **asset allocation** of each fund in the range reflects the risk level. Under typical market conditions, the **asset allocation** of the Fund will be as follows: **Equities**: 25%–50%, **Bonds**: 40%–75%, Other asset types, including cash: 0%–20%. These percentages will fluctuate based upon market movement and adjustments to the **asset allocation** to enable the Fund to meet its aim.
- To demonstrate the performance of the Fund against its sustainable investment aim the environmental, social and governance (ESG) and carbon intensity ratings of the Fund are compared to the ratings of a reference comparator. The reference comparator represents the ESG and carbon intensity ratings the Fund might have achieved if it did not have a sustainable investment aim. The reference comparator is a combination of **market capitalisation indices** that represent the asset classes held by the Fund and in the same proportions (weighting) as the Fund.

Use of Benchmarks

- The Fund is not managed with reference to a benchmark. The performance of the Fund is compared against the performance of funds that are part of the Morningstar Moderately Cautious Allocation Category, with both **returns** and **volatility** considered in the comparison.

Use of Derivatives

- The Fund may invest in different types of **derivatives** for **efficient portfolio management** purposes, including **hedging**, and for broader investment purposes to help the Fund meet its objective. In particular **derivatives** will be used to reduce or increase the Fund's exposure to different types of assets and to reduce the risk associated with movements in the rate of exchange between Sterling and other currencies in which the Fund's assets may be held. The Fund does not intend to use **derivatives** extensively and their use will be consistent with the risk profile of the Fund.
- Income is distributed.
- You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within a period of 5 years.

Risk and Reward Profile

The risk and reward indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Why is this Fund in this specific category?

This Fund is classified in category 4 because its price or simulated data has shown medium fluctuations historically.

Material risks not fully captured by the Risk and Reward Indicator:

- Counterparty Risk** The possibility that the counterparty to a transaction may be unwilling or unable to meet its obligations.
- Credit Risk** A bond or money market security could lose value if the issuer's financial health deteriorates.
- Derivatives Risk** Derivatives can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

- Emerging Markets Risk** Emerging markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.
- Exchange Rate Risk** Changes in currency exchange rates could reduce or increase investment gains or investment losses, in some cases significantly.
- Interest Rate Risk** When interest rates rise, bond values generally fall. This risk of this happening is generally greater the longer the maturity of a bond investment and the higher its credit quality.
- Investment Fund Risk** Investing in other funds involves certain risks an investor would not face if investing in markets directly. Governance of underlying assets can be the responsibility of third-party managers.
- Investment Leverage Risk** Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Liquidity Risk** Liquidity is a measure of how easily the Fund's holdings can be quickly converted to cash. The value of the Fund's holdings may be significantly impacted by liquidity risk during adverse market conditions.
- Operational Risk** Operational errors may affect transactions, valuation, accounting, financial reporting and other processes relating to the Fund.

Charges

The charges you pay are used to pay the running costs of the Fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing charge	0.77%
----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

- The entry and exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.
- A conversion charge may be payable.
- The ongoing charges figure shown here is an estimate of the charges. The ongoing charges figure shown is an estimate due to a material change in the fee structure. The Fund's annual report for each financial year will include detail on the exact charges made.

Further information on Charges can be found in the "Fees and Expenses" section of the Fund's Prospectus.

Past Performance

- Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up.
- Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges but not entry, exit or conversion charges.
- The past performance of this share class is calculated in GBP.
- The Fund was launched on 24 October 2018.

Vanguard ESG Developed World All Cap Equity Index Fund (UK) (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Acc

ISIN: GB00BLLZQL34

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the FTSE Developed All Cap Choice Index (the "Index")
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund promotes environmental and social characteristics by excluding companies from its portfolio based on the impact of their conduct or products on society and / or the environment. This is met by tracking the Index.
- The Index is a market-capitalisation weighted index representing the performance of large, mid and small-size shares covering developed markets around the world. Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company. The Index is constructed from the FTSE Developed All Cap Index (the "Parent Index") which is screened for certain environmental, social, and corporate governance (referred to as "ESG") criteria by the sponsor of the Index, which is independent of Vanguard.
- The Index excludes shares of companies that the sponsor of the Index determines to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, the following activities: Controversies, Non-renewable energy, Vice products and Weapons.
- The Fund's investments will, at the time of purchase, comply with the ESG requirements of the Index, except as otherwise described below regarding the use of derivatives or in the prospectus. The Fund may hold securities which do not comply with the ESG requirements of the Index until such time as the relevant securities cease to form part of the Index and it is possible and practicable (in the investment manager's view) to liquidate the position.
- The Fund may use derivatives (i.e. a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index) in order to reduce risk or cost and/or generate extra

- income or growth (known as "efficient portfolio management").
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which units in the Fund cannot be sold is available on: <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard Investments Funds ICVC (the "prospectus"). See the Practical Information Section for details of how to obtain a copy of the prospectus.

Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.

- Accuracy risk. There is no assurance that the Index provider will compile the Index accurately or that the Index will be determined, composed or calculated correctly.
- Environmental, Social and Governance risk. A Fund may track an index which screens out possible investments if they do not meet certain environmental, social and governance ("ESG") criteria. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The relevant Fund may perform differently to other funds, including underperforming funds that do not seek to screen investments in this way.
- Unscheduled rebalancing risk. Apart from scheduled rebalances, the index provider may carry out additional ad hoc rebalances to the Benchmark Index in order for example, to correct an error in the selection of index constituents.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

For further information on risks please see the "Risk Factors" section of the prospectus on our website at <https://global.vanguard.com>

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Vanguard ESG Emerging Markets All Cap Equity Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Acc

ISIN: IE00BKV0VZ05

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the FTSE Emerging All Cap Choice Index (the "Index").
- The Index is a market-capitalisation-weighted index composed of large-, mid-, and small-cap stocks of companies located in emerging market countries. Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company. The Index is constructed from the FTSE Emerging All Cap Index (the "Parent Index") which is then screened for certain environmental, social, and corporate governance criteria by the sponsor of the Index, which is independent of Vanguard.
- The Fund promotes environmental and social characteristics by excluding companies from its portfolio based on the impact of their conduct or products on society and / or the environment. This is met by tracking the Index.
- The Index excludes shares of companies that the sponsor of the Index determines to be engaged or involved in, and / or derive revenue (above a threshold specified by the Index provider) from, the following activities: Controversies, Non-renewable energy, Vice products and Weapons.
- The Fund's investments will, at the time of purchase, comply with the ESG requirements of the Index, except as otherwise described below regarding the use of derivatives or in the prospectus. The Fund may hold securities which do not comply with the ESG requirements of the Index until such time as the relevant securities cease to form part of the Index and it is possible and practicable (in the investment manager's view) to liquidate the position.
- The Fund attempts to:
 - Track the performance of Index by investing in all, or substantially all, of the constituent securities of the Index in the same proportion as the Index. Where not practicable to fully replicate, the Fund will use a sampling process.
 - Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may invest in financial derivative instruments that could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. Some derivatives give rise to increased potential for loss where the Fund's counterparty defaults in meeting its payment obligations. Where the Fund uses derivatives, derivatives on an index (e.g. swaps, futures) may contain some underlying constituents which may not meet the relevant ESG ratings/criteria applied by the Index.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund. In this regard, the Fund may receive collateral which may not meet the relevant ESG ratings/criteria applied by the Index.
- The Fund may not be appropriate for short-term investment.
- This share class is an accumulating share class and the Directors do not intend to declare a dividend. Income will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11630>

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc prospectus (the "prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 5 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of

the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.

- Index sampling risk. As the Fund may use an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Accuracy risk. There is no assurance that the Index provider will compile the Index accurately or that the Index will be determined, composed or calculated correctly.
- Environmental, Social and Governance risk. A Fund may track an index which screens out possible investments if they do not meet certain environmental, social and governance ("ESG") criteria. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The relevant Fund may perform differently to other funds, including underperforming funds that do not seek to screen investments in this way.
- Unscheduled rebalancing risk. Apart from scheduled rebalances, the index provider may carry out additional ad hoc rebalances to the Index in order for example, to correct an error in the selection of index constituents.

Vanguard Global Bond Index Fund (the "Fund")

A sub-fund of Vanguard Investment Series Plc

GBP Hedged Acc

ISIN: IE00B50W2R13

Manager: Vanguard Group (Ireland) Limited ("VGIL")

Objectives and investment policy

- The Fund employs a passive management – or indexing – investment approach and seeks to track the performance of the Bloomberg Barclays Global Aggregate Float Adjusted and Scaled Index (the "Index").
- The Index includes investment-grade bonds from around the world with maturities greater than one year.
- The Index is a market-weighted index of global government, government-related agencies, corporate and securitised fixed income investments with maturities greater than one year.
- The Fund attempts to:
 1. Track the performance of the Index by investing in a portfolio of securities that, insofar as possible and practicable, consists of a representative sample of the component securities of the Index.
 2. Remain fully invested except in extraordinary market, political or similar conditions.
- The Fund may use derivatives in order to reduce risk or cost and/or generate extra income or growth. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value. A derivative is a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index.
- The currency of the share class is GBP.
- The Fund invests in securities which are denominated in currencies other than the share class currency. Movements in currency exchange rates can affect the return of investments. Currency hedging techniques are used to minimise the risks associated with movements in currency exchange rates but these risks cannot be eliminated entirely. As this document relates to a share class where such techniques are used, for the purposes of the "Past performance" section below, the performance of this share class is shown against the Bloomberg Barclays Global Aggregate Float Adjusted and Scaled Index Hedged in GBP (the "Hedged Index"), which is a currency hedged version of the Index.
- The Fund may engage in short term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- The Fund may not be appropriate for short-term investment.
- Income from the Fund will be reinvested and reflected in the price of shares in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing. A full list of the days on which shares in the Fund cannot be sold is available on <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11630>

For further information about the objectives and investment policy of the Fund, as well as the limited relationship with the Index provider, please see Appendix 1 and Appendix 6 of the Vanguard Investment Series plc prospectus (the "prospectus") on our website at <https://global.vanguard.com>

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 3 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - The value of bonds and fixed income-related securities is affected by influential factors such as interest rates, inflation, credit spreads and volatility which, in turn, are driven by other factors including political, economic news, company earnings and significant corporate events.
 - Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used but is not guaranteed to completely eliminate currency risk.
 - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfers of assets and failed/delayed delivery of securities or payments to the Fund.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.

- Credit risk. The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Inflation risk. The value of your investments may not be worth as much in the future due to changes in purchasing power resulting from inflation.

Vanguard U.K. Inflation-Linked Gilt Index Fund (the "Fund")

A sub-fund of Vanguard® Investments Funds ICVC

GBP Acc

ISIN: GB00B45Q9038

Authorised Corporate Director: Vanguard Investments UK, Limited ("VIUK")

Objectives and investment policy

- The Fund seeks to track the performance of the Bloomberg Barclays U.K. Government Inflation-Linked Float Adjusted Bond Index (the "Index").
- The Index is a float adjusted market-capitalisation weighted index representing the U.K. government inflation-linked bond market with maturities greater than one year.
- Float adjusted means that the Index is calculated to include only securities that are readily available to purchase on the market, rather than the total amount of securities issued.
- Market-capitalisation is the value of an issuer's outstanding securities in the market and shows the size of an issuer's total outstanding securities.
- More than 35% in value of the property of the Fund may be invested in government and public securities issued or guaranteed by the Government of the United Kingdom.
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to:
 1. Track the performance of the Index by investing in a representative sample of Index constituent bonds.
 2. Remain fully invested and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives (i.e. a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index) in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management").
- The currency of the share class is GBP.
- The Fund is more appropriate for long term investments.
- Income from the Fund will be reinvested and reflected in the price of

shares in the Fund.

- Portfolio transaction costs will have an impact on performance.
- Shares in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which units in the Fund cannot be sold is available on: <https://global.vanguard.com/portal/site/loadPDF?country=global&docId=11627>

For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard Investments Funds ICVC (the "prospectus").
